EVALUATION OF ROCKY FLATS SURFACE WATER MONITORING PROGRAMS -JEE-0006-92

This letter pertains to your request (WDEM:GWL:8746, October 24, 1991) for further evaluation of the Rocky Flats Surface Water Monitoring Programs. EG&G Environmental Management (EM) committed to completion of an action plan that critically evaluates the effectiveness of the Rocky Flats Surface Water and Sediment Monitoring Programs (91-RF-8087, November 13, 1991) and scheduled the draft evaluation to be delivered to DOE/RFO by January 6, 1992 (91-RF-8346, November 18, 1991).

EM completed the draft document on December 20, 1991, and requested comment from numerous EG&G organizations and your staff. The review comments that EM received on January 2, 1992, indicated that additional work on the document would be required prior to formal submittal. EM was given verbal direction by your staff that a delay of the scheduled delivery date is appropriate to incorporate the comments.

The magnitude of changes contemplated and diversity of comments we have received on the draft document makes commitment of a delivery date difficult. We will continue to work with your staff to meet their needs and produce a timely, quality document.

Please contact Greg Wetherbee of the Surface Water Division at extension 7756 if you have questions about the preparation of this deliverable.
